Samra Maqbool **Head of Strategy and Business Development**

Our exports business has been on an accelerated growth path and has been catering to consumer preferences around the globe with our trusted brands. Nestlé Pakistan's diverse product portfolio is a top consumer choice globally. We take great pride in the journey we have covered so far. We are continually on the lookout to offer convenience and delight consumers with our nutritious products in more markets. Our exports business has evolved since its inception and delivers in 10 markets around the world. The team looks forward to exploring and expanding your business horizons by marking uncharted territories in your market.

NESTLÉ in Pakistan is operating since 1988 under a joint venture with Milk Pak Ltd. Since taking over management in 1992, the company is proud of its commitment to excellence in product safety and quality and to providing value and aims to be the leading Nutrition, Health, and Wellness Company. As a socially responsible corporate, we focus on environment friendly operations, ethical business practices and our responsibility towards the communities.

The company's strategy is guided by Nestlé's Corporate Business Principles which are in line with internationally accepted best practices and ethical performance culture. Nestlé's existing products grow through innovation and renovation while maintaining a balance in geographic activities and product lines. Long-term potential is never sacrificed for short-term performance. The Company's priority is to bring the best and most relevant products to people, wherever they are, whatever their needs are, and for all age groups.

Today, NESTLÉ Pakistan is the leading Food & Beverages Company in Pakistan with key focus on Nutrition, Health, and Wellness, reaching the remotest of locations throughout Pakistan to serve the consumers. We also pride ourselves in being the leaders in Nutrition, Health & Wellness.

As a company that believes in giving back, we contribute to nutritious and sustainable diets, strengthen communities, and help to protect, renew, and restore natural resources.

CONTRIBUTING TO NUTRITIOUS AND SUSTAINABLE DIETS

Enabling healthier and happier lives

2030 Global Ambition: Help 50 million children lead healthier lives.

Food is not just a source of nutrition; it also brings us together as families or friends. The United Nations believes the food industry has a vital role to play in helping enable healthier lives.

At NESTLÉ, we believe this and aim to help shape a better and healthier world. This was how we started over 150 years ago when our founder Henri NESTLÉ created an infant cereal that saved a child's life.

NESTLÉ is building, sharing, and applying its nutritional knowledge, and contributing to a healthier future. We firmly believe that nutrition and hydration play a role in helping manage and treat diseases. We have a research team focused on how to achieve this.

STRENGTHENING COMMUNITIES

Helping develop thriving and resilient communities

2030 Global Ambition: Help to improve 30 million livelihoods in communities directly connected to our business activities.

NESTLÉ began as a family business in a small town over 150 years ago. This local approach informs everything we do. We are part of the local communities where we operate from.

Being part of a community brings great responsibility towards it too, the greatest being respecting the rights of those who work for us and with us.

We believe in improving livelihoods and developing thriving communities. We do this by supporting women to be economically and socially active, enabling them to be independent. We work particularly in rural areas, to support farmers by training them, enabling both men and women to contribute to the workforce and build a brighter future for themselves and their families.

HELPING TO PROTECT, RENEW AND RESTORE NATURAL RESOURCES

Stewarding resources for the future generations

2030 Global Ambition: Striving for zero environmental impact in our operations.

We rely on raw materials to make our products. To continue doing so, we must use raw materials responsibly, safeguarding these shared resources for the future. Our 2030 ambition is to strive for zero environmental impact in our operations, with a special focus on reducing water withdrawals, increasing renewable energy use, achieving zero waste to landfill, and innovating sustainable packaging solutions.

Alongside our 2030 operational ambition, in December 2020 we launched our Net Zero Roadmap, announcing our intention to halve absolute emissions by 2030 and bring them to net zero by 2050. Achieving this will require addressing emissions throughout our value chain, implementing regenerative agriculture and nature-based solutions such as agroforestry and land restoration. The roadmap will transform the way we operate, helping us to inspire change and deliver impact.

NOURISHING TOGETHER EVERY POSSIBLE IN YOUR CHILD

The **NESTLÉ NANGROW** story is one of pioneering innovations backed by over 150 years of **NESTLÉ'S** expertise in child nutrition.

At **NESTLÉ NANGROW**, we believe that possibilities are physical and intellectual capabilities and skills that children have in themselves. Beyond possibilities, **EVERY POSSIBLE** captures the world of opportunities children will have to become the best they can be at every stage.

NESTLÉ NANGROW's formulation contains **2'FL (HMO)**, an Oligosaccharide structurally identical to the most abundant one found in breast milk.

2'FL HMO contributes to innate immunity by enhancing growth of beneficial bacteria and modulating the immune system. In the absence of breastmilk, **NESTLÉ NANGROW** with **2'FL HMO** can support children's immune systems, thus helping them build a strong foundation for their future.

The brand purpose for **NESTLÉ CERELAC** is **"Together, Passionately Nourishing Babies to Blossom."** Staying true to that, NESTLÉ CERELAC is now with its second generation of users in Pakistan and is a household name, trusted by mothers and endorsed by doctors.

It is positioned as the "First step to solid food", after 6 months of age, in continuation with breastfeeding, and marketed as fortified cereals which support the physical & cognitive development in growing children. However, a baby's nutritional requirements evolve as they grow. In order to provide the right nutrition in accordance with a child's growth, the NESTLÉ CERELAC range is divided into stages based on the baby's age. Mothers have come to trust and love the brand over time.
